Projects

1. Artemis Nestle Connected Freezers -

Role : L2 Support | Jan 2023 – Apr 2023

I worked as L2 support and responsible for handling tickets, Customer queries. Worked on Dev-Ops portal for following up with the building and merging the Pipelines. I have worked with front-end and back end team for validating the data of freezers with respect to customer requirements.

Key Responsibilities:

- Ticket Handling and Customer Queries
- DevOps Pipeline Management
- Data Validation with Front-end and Back-end Teams

Working as an L2 Support Specialist in a DevOps environment allowed me to hone my problem-solving, communication, and collaboration skills. I had the opportunity to play a critical role in ensuring the smooth operation of development pipelines and satisfying customer requirements. This experience has equipped me with a deep understanding of the importance of DevOps practices and the value of effective support in driving the success of software development projects.

I am excited to continue my journey in the field of DevOps and leverage my skills to contribute to the success of future projects.

2. Digital Twin -

Role : Angular UI Developer | May 2023 – Present

Currently working as an Angular UI developer and was responsible for making UI changes according to customer requirements and deploy the app in dev and demo environment using Jenkins

I have done URL changes in the case of rebranding as per customer requirements and managed the timely renewal of SSL certificates to maintain secure website connections.

Responsibilities:

- User Interface Development
- Component Development
- Styling and Theming

- Version Control
- Keeping Up with Trends
- Deployment and Continuous Integration
- Cross-Browser Compatibility
